Institution of Mechanical Engineers

LECTURE: Engineering the World - Technology for ALL!

ENGINEERS AGAINST POVERTY

Engineers Against Poverty (EAP) is a UK based international development NGO committed to producing practical policies and innovative solutions to support the alleviation and eventual ending of world poverty.

Wiring team on the Java-Bali Transmission Line, Indonesia. EAP worked with Balfour Beatty to identify opportunities to enhance the company's social performance

PARRY ASSOCIATES
JPM Parry & Associates
Actions speak louder . . .

JPM Parry & Associates Ltd is a Black Country engineering company that manufactures appropriate technology equipment for the production of high-quality building materials in developing countries. Parry innovations improve quality of life, create sustainable businesses and are environmentally beneficial.

The introduction of Parry technology has established over 30,000 livelihoods worldwide. Local people and materials create quality products without the need for imports.

How are UK **Engineers** committed to producing practical policies and innovative solutions to support the alleviation and eventual ending of **world poverty**? Engineers have special expertise in improving our quality of life, so how are we using these skills to help the world we live in? – **FIND OUT from the EXPERTS!**

This lecture is a must for anyone interested in:

- Sustainable Development
- Appropriate Technology
- Global Manufacturing
- Corporate & Social Responsibility
