

THE CLAY CRUSHING MACHINE

Hardened steel crusher head abrasion resistant for long life.

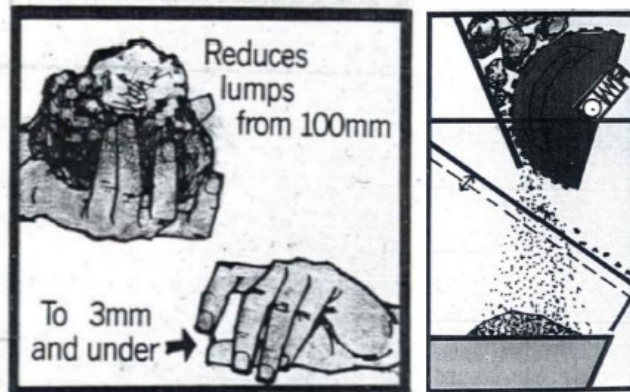

The new crushing machine is a development from a larger unit developed in the 1980s which gained a UK patent (no. 2117268). The new machine crushes both clay and Stabilite 'cake' to produce lightweight aggregate.

Wheelbarrow collects the output from the crusher heads inside the machine.

THE EARLIER DEVELOPED PENDULUM CLAY CRUSHER

CURRENT DEVELOPMENT STATUS:

Prototype currently under construction.

PROCESSING CAPACITY:

Output 2 to 16 kg per minute depending on hardness of materials.
